WAYS TO IMPROVE THE QUALITY AND ACCESSIBILITY OF E-LEARNING

(example of dornod university)

Abstract

E-learning is being more widely used in the modern world, while traditional (teacher-centered) or classroom learning was common in the middle of the 20th century. The rapid growth of IT use is requiring modernization in the forms of teaching and methods in any stage of education.

Professors of Dornod University organized their classes online using Google Classroom during the semester. In the past, professors of the university have a few experiences of organizing some classes online, but they have never fully computerized the lessons throughout a whole semester, and the students didn't even study the lessons online for such a long term. Although the sudden government decision was difficult for both parties, the e-learning had been managed successfully.

Nowadays getting an education is more liberalized that meets the needs and interests of students and allows them to choose their own learning environment, pace, and duration of the study.(Tsedevsuren 2017). Similarly, e-learning has faced many requirements, such as good quality, accessibility, and comprehensibility when reaching students. In this study, we surveyed students of Dornod University to determine the quality and availability of online courses, conducted in the second term of the last academic year.

The purpose of this study is to provide feedback on what measures can be taken to improve the quality and accessibility of e-learning in the future, as well as other options and methods.

Key words: learning, e-learning, student, accessibility, quality

Зохиогчдын тухай

1. Батсүхийн Доржпүрэв, төгссөн сургууль: Чингис хаан дээд сургууль. Судалгааны ажлын туршлага: Аялал жуулчлал, менежментийн чиглэлээр олон улс, улс, бүс, орон нутагт 40 гаруй илтгэл, өгүүлэл бичсэн.
2. Цогтбаатарын Номин-Эрдэнэ, төгссөн сургууль: Монгол улсын их сургууль, судалгааны ажлын туршлага: жил бүр 2-3 судалгаа, өгүүлэл бичиж хэвлүүлж, хэлэлцүүлж байсан. /олон улс, улс, бүс, орон нутагт/ /Нийтдээ 10 гаруй судалгааны ажил, төсөл хөтөлбөр/ Төсөл хөтөлбөр хэрэгжүүлж байсан.
