## INFLECTING OF THE STEAM TECHNOLOGY TO THE NATIONAL EDUCATIONAL STANDARD DEVELOPMENT

(Samples based on the Math set and English language active or passive patterns)

## Abstract

The article proposes learning language and mathematics are the similar intellectual acts. These cognitive learning processes takes place in interactions. It explains knowledge as emerging from as the network connections that bind and complete each other, in other words, a system of complex connections that uniteand relate one another. Therefore, learning networks within networks, in the learning process. This paper work exampled on the concept of English active and passive patterns that is explained in the mathematical set. This evidence created and mentioned as the teaching approach which is based on the integration of the sciences into the modernization of today's education in Mongolia. Especially it is a new generation (the z and alpha ages) of human development to participate in the international intellectual labor market, to study and to compete, to make an important contribution to raising and sharing the intellectual capital of the Mongolian people. To create it, the transformation of knowledge management of any logic at every level of recognition that opens the way for more intellectual capital of teachers and students to cultivate.

**Knowledge:** management, knowledge transformation, science integration, acquisition, intellectual acts

## Зохиогчийн тухай

Ишжамцын Булган, 2006 онд "Маргад" дээд сургуульд бакалавр, 2009 онд ХУИС магистр төгссөн. 2017-2018 онд монгол, оросын өв соёлын хамтарсан экспедицид судлаачаар ажилласан, 2018-2019 онд Тайвань улсад соёл-хэл шинжлэлээр докторантурт, 2020 оноос Эрдмийн Их Сургуульд Боловсролын менежментээр докторантурт суралцаж байна.
